What is new in - HIG 5.5.7

Configurable Shortcuts for Displaying Inclusions

The following keyboard shortcuts are now used in the Scene:

- **Scene: Show Current Inclusions** is SHIFT+Q
- **Scene: Show All Inclusions** is ALT+Q

The default values can be redefined by user via **Settings** > **General** > **Shortcuts**.

Inclusions - Grey Status

Now you are able to set Grey Status for inclusions of your model. Inclusions having this status will not be taken into account during allocation.
