

## Planning cum Centering machine for Round Brilliant

### **SPECIFICATIONS**

- Weight : 18 Kg. (Excluding Computer System)
- Dimension : 180(W) x 450(L) x 275 (H)mm(Excluding Computer System)
- Supply : 220 VAC, 50 HZ, 1 Phase
- Load : 500 VA
- Computer System : Standard PC Platform

### **Function**

1. This is a planning cum centering machine for Round Brilliant as well as for rounded fancies like (Marquise, Pear, Oval, Heart etc.)
2. The machine will first perform the planning process on the rough diamond and suggest the various possible cut class and size of the finished diamond from the rough.

### **Salient Features**

1. This Machine will help in optimization of Finished Diamond size and maximization of value recovery. And also make it possible to reduce production cost, by making use of low cost Econobruiter in place of AutoBruters.
2. Instant display of possible selling price of finished stone.
3. Single machine, both for rounds,
4. 2 piece pot for round and 4 piece pot for fancies.
