

A novice polisher can give quality output similar to an expert polisher with many years of experience, while still increasing the output.

Introducing "GALAHAD Compass+", an ultimate production assistant to a polisher. It helps the polisher achieve 2x to 4x productivity.

It helps the polisher polish the Fancy Cut diamonds right from the bruting stage, with no demand for auto blocking or laser faceting.

Salient Features :

- Fulfilling Design Promise: Achieve the desired design outcomes effortlessly with the assistance of "GALAHAD Compass+".
- **Minimize Scans:** Reduce the number of scans required during the polishing process, saving time and resources.
- No Over-Polishing: Say good bye to worries of over-polishing. It ensures the STOP at the desired depth.
- **Increased Productivity:** Boost productivity significantly for both the polisher and the company, allowing more work to be done with minimal investment.
- **Easy to Use:** "GALAHAD Compass+" acts as a skilled assistant to the polisher, enabling one operator to handle multiple dops simultaneously without compromising quality.
- Blocking Report in Gujarati: The blocking report, available in the Gujarati language, facilitates clear communication and seamless operations.
- Enhanced earning: As one polisher can work on 2 to 4 diamonds simultaneously, without any fear of over-polishing at any time, his output grows 2x to 4x.
- Upgrade Option: If you already own the GALAHAD Compass, upgrading to "GALAHAD Compass+" is simple and easy.

Experience the revolution in the polishing industry with GALAHAD Compass+, making any design cut polishing a breeze and unlocking new levels of efficiency and quality in your work.
